

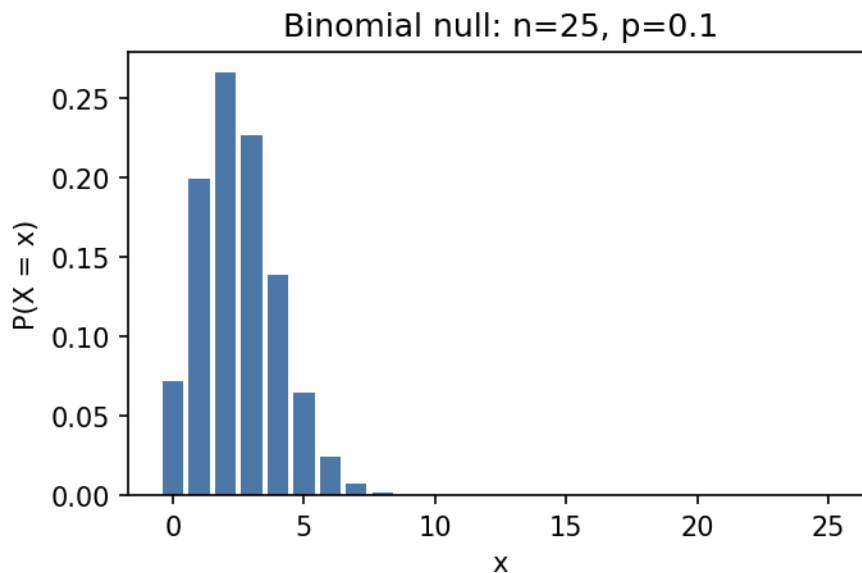

Graph Interpretation Pack

Optional visual practice for Canvas-style items

Graph Interpretation Pack

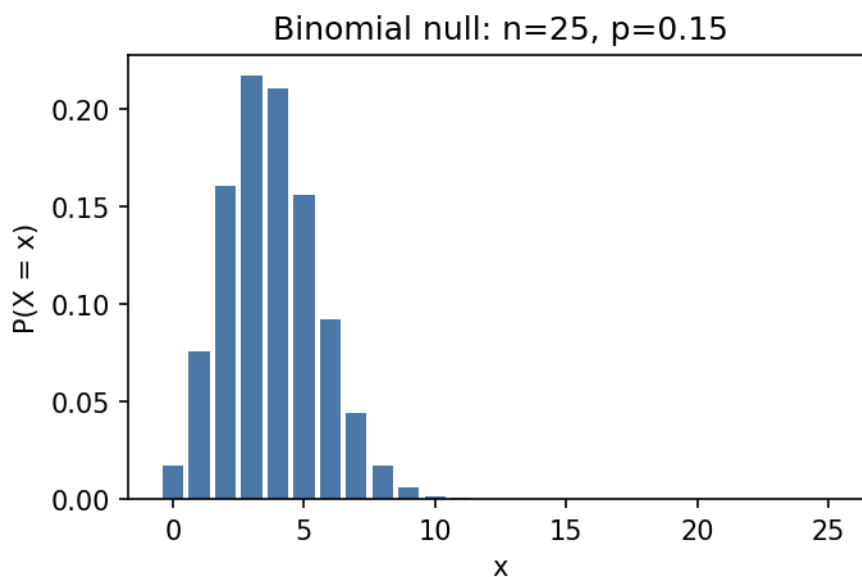

These are extra **image-based** practice items aligned to Module 1/3 visual skills.

1) Binomial Null Plot (right-tail)

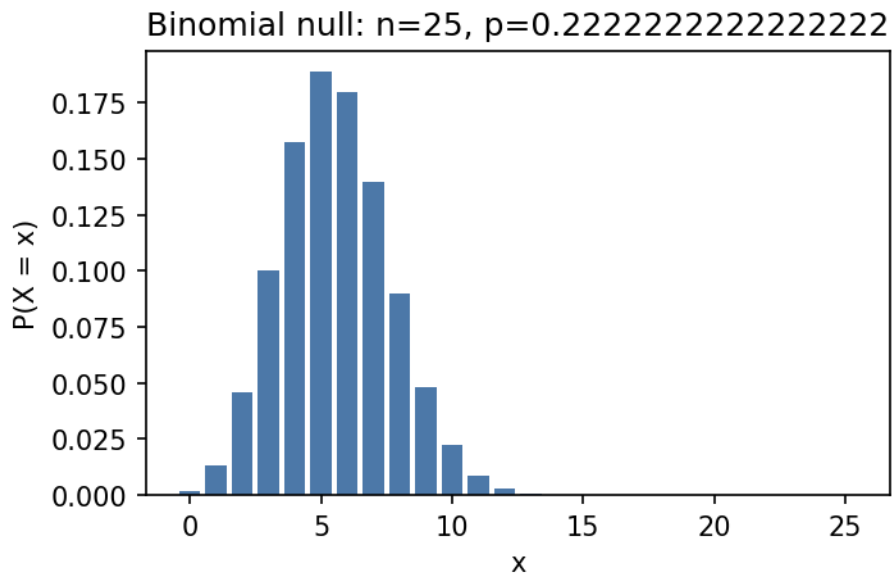

Given observed $x = 6$ with $H_a: p > p_0$, which tail is the p-value region?

2) Binomial Null Plot (left-tail)

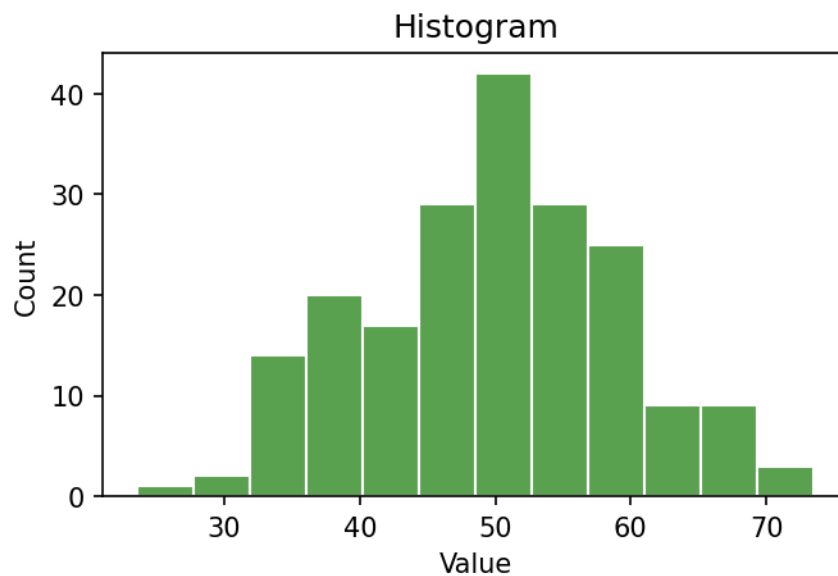

Given observed $x = 2$ with $H_a: p < p_0$, which tail is the p-value region?

3) Binomial Null Plot (two-sided)

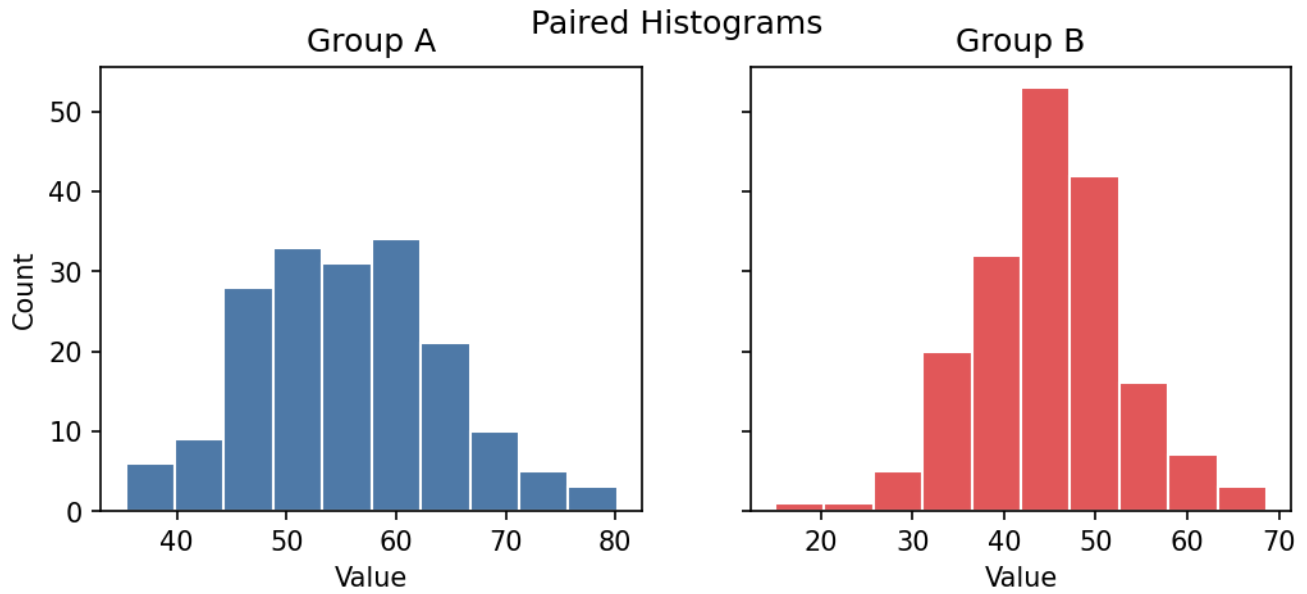

Given observed $x = 2$ with $H_a: p \neq p_0$, which regions are included in the p-value?

4) Histogram

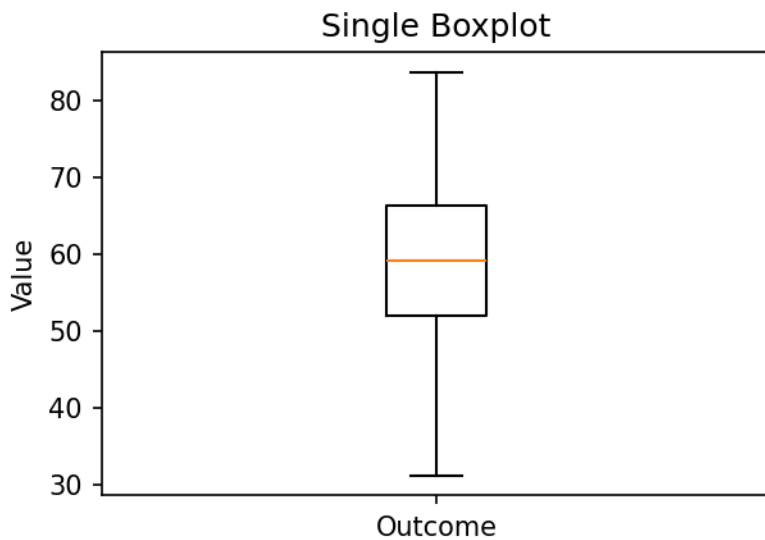

What does this graph display?

5) Paired Histograms

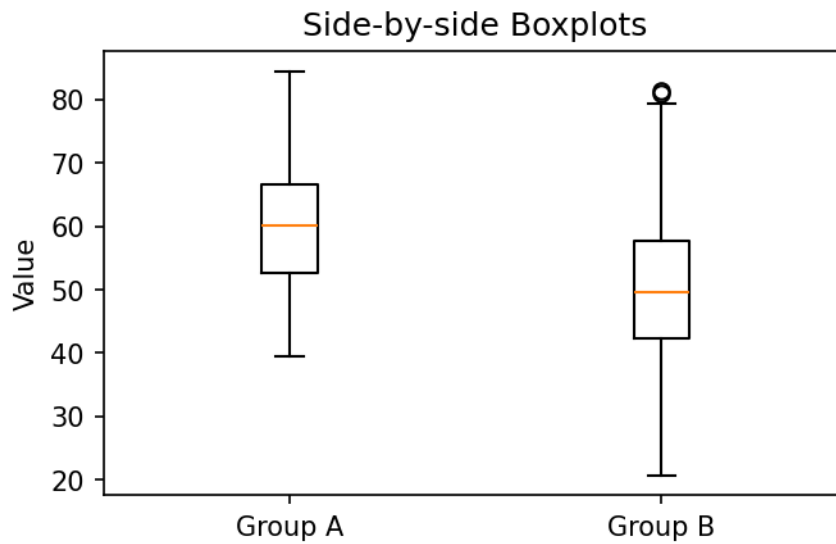

Which group appears to have the higher typical value?

6) Single Boxplot

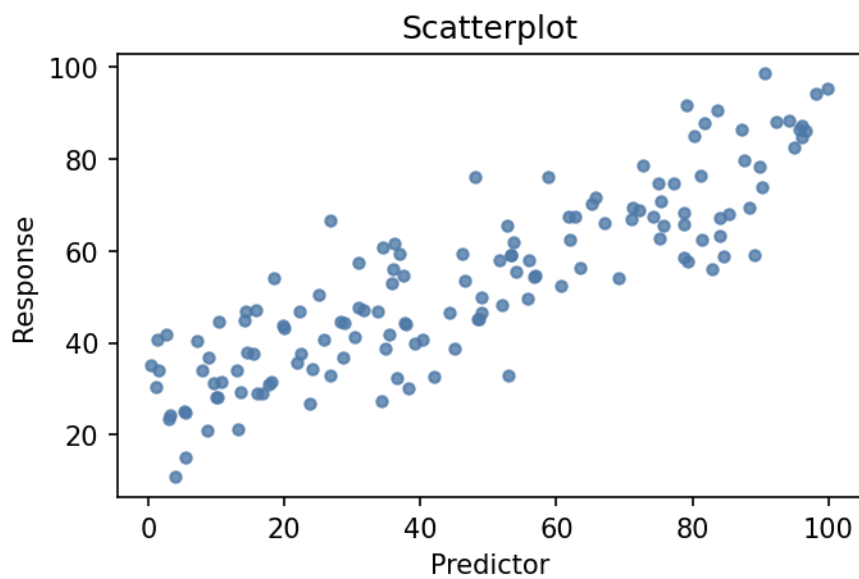

Which quantity is represented by the horizontal line inside the box?

7) Side-by-side Boxplots

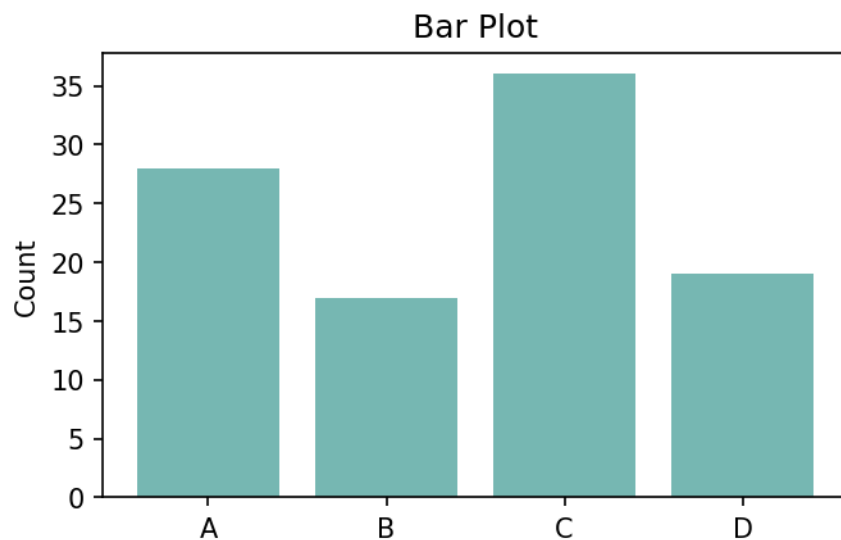

Which group has larger spread (IQR)?

8) Scatterplot

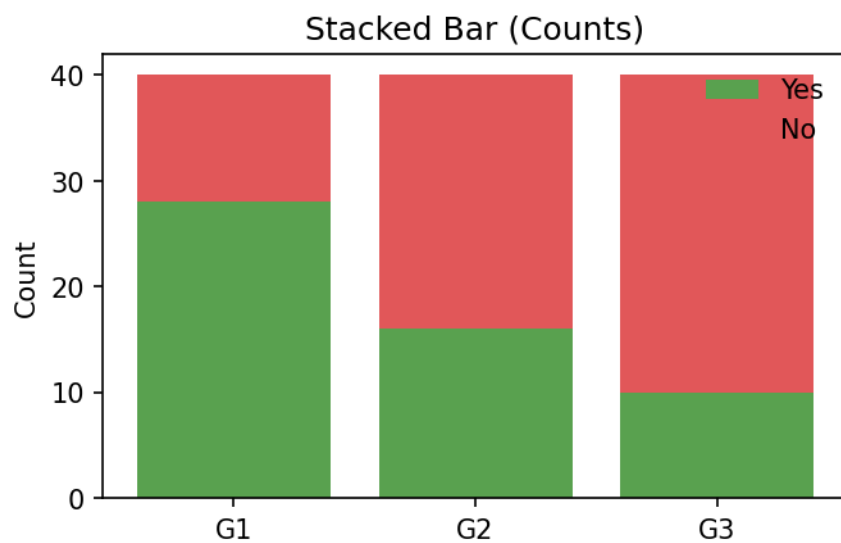

Describe form, direction, and strength.

9) Bar Plot

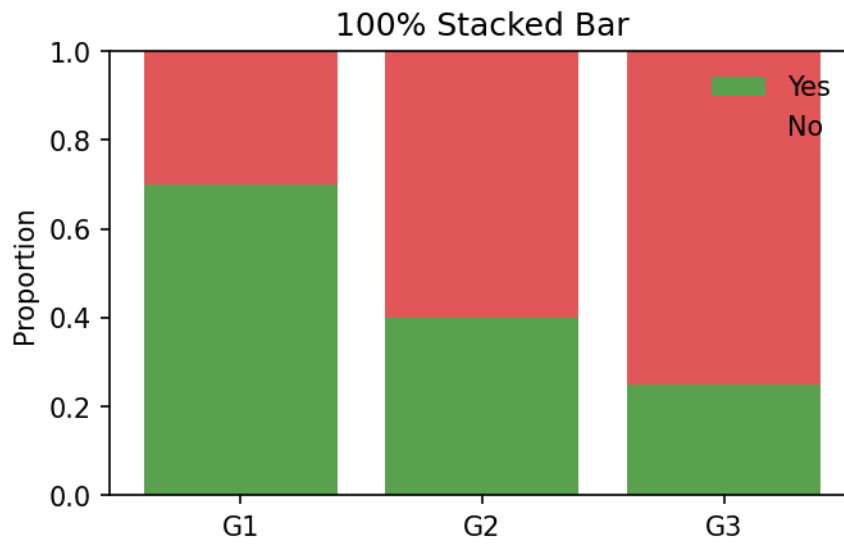

What variable type is on the x-axis?

10) Stacked Bar (Counts)

What is most appropriate to compare directly: raw counts or within-group proportions?

11) 100% Stacked Bar

What is most appropriate to compare directly across groups?
